CAPS Experience Improvements

CAPS Version 4.47 – April 7, 2025
o Enhanced Performance Features:
  o Fan Grid and Comparison Enhancements for Faster Selection:
    - Increased Speed-new features designed to accelerate the selection process, saving up to 23%
    - Enhanced Fan Grid – Faster fan grid experience for quicker decision-making
    - Hover-Over Experience-Easily review min/max fan curves directly in the grid
    - Improved Comparison Feature-View and compare min/mas fan curves in the grid
  o Improved Import Tool to deliver better functionality and ease of use:
    - Simplified Formatting-a more forgiving process with intuitive mapping, reducing formatting issues
    - Includes Dimensional Products-dampers, louvers, GRDs and ATUs
    - Enhanced Import Functionality-upgraded to improve overall efficiency
  o Product Selection Guidance-new tools designed to improve selection accuracy and efficiency:
    - Core Product Selection Indicators-Make informed selections and focus on choosing our core products with indicators
    - Lead-Time Transparency-Understand what's Impacting your lead times directly within your selection
    - Uncommon Selection Indicators-visual alerts ensure you verify infrequent choices before finalizing
  o Review Changes Upon Conversion-highly requested feature makes it easier to track changes:
    - Change Notifications-clearly flagged changes that show you exactly what's being modified in your selection
    - Improved Transparency-see both the original and updated values, making it easier to track changes
    - Critical Value Alerts-notifications now include changes to critical values, not just inputs you made
    - Automatic Review-get alerted when a default value changes during selection
  (Click on "What's New in CAPS 4.47" link below for Video's featuring above enhancements)
    o Report default changed to PDF allows user to process multiple reports at a time
    o Faster reopening of jobs when a job in the current version/sub-version is not updated
    o GRD model consolidation continuation
o Non-Dimensional Model Groups Added to Transitional CAPS:
  o AER and BAER
  o FumeJet® models FJ(new) & FJC
  o Tubular upblast model TAUB
  o TBI models
  o SP/CSP models
  o Curb extension models: GPE, GPEX, ISB, VCE, ATE

- o Allows user to run multiple versions of reports on same job file at same time
- o For Demo go to the CAPS Live Page under Links and click on *CAPS New Reports Video*

_____

CAPS Version 4.43 - December 04, 2023
- o Enhanced layout features:
  - o Layout questions have light gray background.
  - o Blue or red color label and icons based on validation state.
  - o Width of layout question increased to allow two icons to be displayed.
  - o Updated the UI so the width of the answer box will match the length of the associated question for more consistent look & feel.
  - o Label repositioned to allow more characters to be displayed.
  - o Text in Drop down option now wraps for full display.
  - o Selected option in drop down displays in bold with light blue background.
  - o Checkbox Icon for custom controls Active and Modify appear different then row selector checkbox and will appear Blue for active and Gray when disabled.
- o "Reset to Default" renamed to "RESET VALUE"

CAPS Version 4.42 - August 7, 2023
- o First group of Dampers added to Transitional CAPS
- o Batch edit is default grid experience –allowing ability to add new lines in this mode.
- o User now has the capability to enlarge the grid, collapse the sales bill and reset the grid feature.

CAPS Version 4.41 - April 17, 2023
- New Fan Selector was deployed in 4.41 CAPS - improving selection efficiency.
- Ability to select and update values for multiple rows using the new **Global Edit** feature.
- Alternative edit experience using **Batch Edit** allowing you to make multiple changes in the grid and load all changes at once.
- Selecting any of the edit features -Fast Data Entry, Batch Edit or Global Edit – will transform the current grid into the experience for that feature and enables the full-screen to allow visibility to more grid rows.
- Enhanced UI fonts making the text clearer and darker for easier readability.

CAPS Version 4.40 - December 05, 2022
- o First group of Louvers added to Transitional CAPS
- o Interactive Row Status Icon providing error messaging (when clicked).
- o Capability to customize your grid experience including the ability to select, reorder and remove columns.
- o Ability to quickly enter required data in the grid using the new Fast Data Entry feature.
- o Easy access on the grid menu to additional data entry functions such as "Import" and "Add by Performance."
- o New conflict messaging providing better guidance on selection conflicts.
