REVolutionize HVAC Product Selection

with the TIME-SAVING eCAPS® Bridge for Revit® Add-In

Select by Performance

Make peformance-based selections, download cut sheets, and insert or download LOD 300 Revit® content directly into your Revit® project.

Select by Model

The LOD 200 Revit® family for each product can either be downloaded or directly inserted into the active Revit® project.

eCAPS® Jobs

Access product selections made to saved jobs in your eCAPS® account and insert into the active Revit® project or download to your PC.

Reselect

Quickly make modifications to selected LOD 300 families in the Revit® project.

Create Greenheck Schedule

Automates equipment schedule generation.

Create New Mapping

Decide which Greenheck LOD 300 families to add and map your specified shared parameters to.
Load/Edit Mapping

Open and edit existing mapping configuration files.

Apply Mapping

Select which Greenheck LOD 300 family instance(s) to map values from Greenheck parameters to user parameters.

Add User Parameters

Add user parameters to any Greenheck family instance present in the project environment.
