

The closed indicator switch is a high sensitivity hinge lever used on curtain fire dampers. When the damper blades close, the closed indicator switch sends a signal that the damper is closed.

See complete marking on product.
UL 508 Classification E41515

Rated Current	15A
Switch Type	Single pole, double throw type
Operating Temperature	-13°F to 176°F (-25°C to 80°C)
Max. Voltage Rating	250V
