

BULLETIN

JULY 29, 2024 | BULLETIN 32-24

TO: All Greenheck Representatives
FROM: Mike Glodowski, Senior Application Engineer
Sam Armstrong, Application Engineer
SUBJECT: Webinar: New in CAPS® 4.45

Join us for a webinar covering CAPS® updates for Dedicated Outdoor Air Systems (DOAS) and Tempered Air Products (TAP).

DOAS topics include:

- New RVE-20 – includes polymer energy recovery wheel up to 2,000 cfm
- RV-75 and RVE-150 case expansion – increased to 18,000 cfm and 70 tons
- Enhanced roof curb drawings
- New R-454B refrigerant (replacing R-410A)
- Obsolete Split DX Cooling
- Obsolete RV-110, REV-180, RVC-145 (covered by RV-75 and RVE-150 expansion)

TAP topics include:

- DG-PDX units have been fully obsolete and are no longer orderable
- FEI calculations have been updated to accommodate single phase for VG fan models
- Updated drawings for the GKD curbs on housings 35 and larger
- The hybrid centrifugal and larger mixed flow fan models have a 10% price increase
- Split DX cooling will no longer be selectable for new marks, previously selected units will remain orderable until September 23rd
- Packaged DX cooling selections with R410a will no longer be available, previously selected units will remain orderable until September 23rd
- New PDX design will be selectable after the September 23rd CAPS update, but not orderable until CAPS 4.46 on December 2nd

These updates will go live on August 5 with the CAPS 4.45 update.
