

BULLETIN

DECEMBER 23, 2024

TO: All Greenheck Representatives
FROM: Andy Jackson
Product Manager, Senior, Louvers
SUBJECT: Select Louver Model/Option Obsolescence

Greenheck is committed to ensuring you have the louver products you need to succeed in your market. To that end, we are equally committed to ensuring our production capacity is dedicated to the highest demand core louver products.

With the release of CAPS® 4.47 in April 2025 we will be obsoleting six (6) extremely low sales volume and/or repetitive louver models (**Figure 1**). New selections of these louvers will not be available upon the release of CAPS® 4.47. Prior selections will convert and be orderable up until the release of CAPS® 4.48 in August 2025, provided orders are released on standard schedulable lead time.

Louver Model	Description
EDD-601	6 in., Stationary, Dual Drainable
ESK-402	4 in., Stationary, K Blade
EHM-601	6 in., Stationary, Dual Drainable, Recessed Mullion
EACC-401	4 in., Combo Louver/Damper, Concealed Actuator
GCE-402	4 in., Combo Louver/Damper, Gravity
AFA-801	8 in., Acoustical, Airfoil

Figure 1 (Obsoleted Louvers)

In addition to the louver model obsolescence referenced above, we will be obsoleting the option for 0.125-inch blade material thickness for louver models ESD-403 and ESD-603 upon the release of CAPS® 4.47 in April 2025. Prior selections with this option will NOT convert upon the release of CAPS® 4.47. Should 0.125-inch blade material thickness be required, you may opt to select louver models ESD-435 or ESD-635 where 0.125-inch blade material thickness will still be made available as an option.
