

Genset Solutions: Dampers and Louvers

Engineered For Critical Power. Delivered With Confidence.

Greenheck provides OEMs with the industry's most complete portfolio of dampers and louvers for generator enclosures—designed to ensure reliable airflow, environmental protection, and dependable performance.

Built for Mission-Critical Performance

- Consistent airflow at high pressures and velocities
- Prevent water intrusion in severe weather
- Support reliable generator operation and uptime
- Meet stringent certification and code requirements

Certified Performance

- AMCA certified for air performance and water penetration
- AMCA 540/550 impact and high-velocity rain resistance*
- Miami-Dade Qualified and Florida Product Approved*
- Class A wind-driven rain performance
- Environmental Product Declarations (EPDs)*

Delivery Advantage

- Industry-leading lead times
- Over 95% on-time shipping
- Quick-build options available*

National Manufacturing Footprint

- Providing over 1.2 M sq. ft. louver and damper manufacturing capacity to meet high volume demands with facilities located throughout the U.S.
- Scaling production in line with growth
- Reducing risk through a diversified, multiplant operation

*On select models and products

Louvers

EVH Series

- High-performance stationary vertical rain louver blades
- Available in 3-5 in. depths

EHH Series

- High-performance stationary horizontal rain louver blades
- Available in frame depths ranging from 2-7 in.

ESD Series

- Horizontal stationary drainable louver blades
- Available in frame depths ranging from 2-6 in.

Additional Louver Offerings

Operable blade louvers | Adjustable blade and combination louver/damper | Acoustical louvers

Wide variety of options and accessories, high-performance coatings and finishes

Environmental Product Declarations (EPDs) available for most louvers

Dampers

EM-30 Series

- Backdraft damper
- Extruded aluminum construction

VCD-23

- Control damper with 3V blades
- Galvanized steel construction

VCD-33

- Control damper with airfoil blades
- Galvanized steel construction

VCD-43

- Control damper with airfoil blades
- Extruded aluminum construction

Additional Damper Offerings

Galvanized backdraft and stainless control dampers as well as a wide variety of options and accessories including actuators.

All listed products carry one or more AMCA certifications
