

Application

Model FD-310 is a narrowline static rated fire damper approved for use in walls and partitions with fire resistance ratings of 3 hours or more. This model carries a 3 hour UL fire damper label. UL555 classifies static rated fire dampers for use in HVAC systems that are automatically shut down in the event of fire.

Ratings

UL 555 Fire Resistance Rating

Fire Rating: 3 Hour

Construction

	Standard	Optional
Frame Material	Galvanized steel*	-
Frame Depth	2 $\frac{3}{16}$ in. (56 mm)	-
Blade Material	Galvanized steel*	-
Closure Spring	Stainless steel	-
Fusible Link	165°F (74°C)	212°F (100°C)
Mounting	Vertical	-

* in gauges required by UL listing R13317

* These dimensions are furnished approximately $\frac{1}{4}$ in. (6 mm) undersize.

See complete marking on product.

UL 555 Classification R13317

CAN/ULC S112 Classified Fire Damper

Model FD-310 meets the requirements for fire dampers established by:

- National Fire Protection Association NFPA Standards, 80, 90A, and 101
- International Building Codes (IBC)
- CSFM California State Fire Marshal Fire Listing (#3225-0981:0102)

Options and Accessories

- [Breakaway connections](#)
- Clean wrap
- Closed indicator switch
- Flanges
- [Grille tabs](#)
- [Retaining angles](#)
- Sealed transitions and sleeve
- Transitions: B, B2

Factory Sleeve Option

All fire damper installations require the use of sleeves, angles and methods described in the installation instructions. Sleeves can be field fabricated or factory furnished as a completed damper/sleeve assembly.

Sleeves are galvanized steel and are available in 20 through 10 ga. (1 mm - 3.5 mm) thickness and lengths up to 36 in. (914 mm).

“K” dimension specifies location of damper within the sleeve. Minimum is 4 in. (102 mm), maximum is “L” less 4 in. (102 mm), which allows for mounting angle installation, and duct connection at each end of the sleeve. If “K” dimension is not specified, it will be provided as one half of “L” dimension (damper centered in sleeve).

Note: If using access doors, the door should be installed on the “K” side of the damper.

Sealed Option

When sealed option is selected, B transition will need to be field sealed in the area where duct to sleeve connection is made.

Type A, B, and B2 Sizing

Narrowline FD-310 models are normally supplied in single section only.

Vertical Mount Only		
Inches (mm)	Type A	Type B or B2
Minimum	4 x 4 (102 x 102)	4 x 3 (102 x 76)
Maximum	48 x 48 (1219 x 1219)	48 x 42 (1219 x 1067)

Type A - Maximum Dimensions

Type B - Maximum Dimensions

Type B2 Side View

Type B & B2 Overall Damper Dimensions
