

Application

The SMD-301M is a leakage rated modulating smoke damper with airfoil blades for operational closure in emergency smoke control situations. This model serves the function of both a control damper and smoke damper. The SMD-301M may be installed vertically (with blades running horizontal) or horizontally and is rated for airflow and leakage in either direction.

Greenheck Fan Corporation certifies that the model SMD-301M shown herein is licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 511 and comply with the requirements of the AMCA Certified Ratings Programs. The AMCA Certified Ratings Seal applies to air performance ratings only.

Space Envelopes

Externally mounted actuators always require space outside of the damper sleeve. The “S” dimension illustrates the clearance required for various available actuators.

Worst case space envelopes shown below. Exact dimensions may vary based on specific damper configuration. Consult factory for specific space envelope if necessary.

Actuator Type/Model	B*	T*	S	
	With	With	Piggyback	
	OCI	OCI	No	Yes
24 Volt AC				
MS7520A2015/B Honeywell	½ in. (13 mm)	9 ¹³ / ₁₆ in. (249 mm)	6 in. (152 mm)	NA
MS7520A2213/B Honeywell				

* For dampers 18 in. (457 mm) or more in height these dimensions are 0 in. .

Contained Actuator Option

Dampers can be ordered with a “contained actuator option”. This option will result in the actuator being oriented such that it extends no more than 1 1/2 inches (38 mm) above or below the sleeve. Note that some damper configurations that are 11 inches (279 mm) high or less will have the RRL, RRL/OCI, or TOR mounted on the side opposite the actuator when the contained actuator option is selected.

Sideplate and Sleeve Dimensions

The drawings below and corresponding table show the position of the SMD-301M damper when mounted in a factory sleeve ("A" dimension). The standard mounting locations provide enough space for the mounting of actuators, controls and allow space for installation of retaining angles and duct connections. The following options may affect the range of available mounting locations: smoke detector, NEMA 7 enclosure, transitions, security bars, grille tabs.

The standard location of a damper mounted in a factory sleeve ("A" dimension) is shown below. The damper can be positioned at other locations within a range of 6 in. (152 mm) to 16 in. (406 mm) for the "A" dimension.

in. (mm)	With Sleeve		Sideplate Damper Location "A"
	Minimum Damper Location "A"	Maximum Damper Location "A"	
Compact configuration*	7 3/16 in. (183)	16 (406)	-
Standard (non-compact) Height < 12 in. (305) RRL, RRL/OCI, or TOR	12 (305)	16 (406)	12 (305)
Standard (non-compact) Height ≥ 12 in. (305) RRL, RRL/OCI, or TOR	7 3/16 in. (183)	16 (406)	12 (305)

* Contact factory for more information.

NOTE: Entire damper frame is not required to be installed within the wall. The damper blades, when closed should be contained within the wall.

Transitioned Damper Dimensions

When a smoke damper is being used in conjunction with round or oval ductwork, the SMD-301M can be supplied in a factory sleeve with round or oval transitions on both ends of the sleeve. Dampers should be ordered to the duct dimensions. Drawings below show overall damper size.

TYPE O

TYPE C

* These dimensions are furnished approximately 1/4 in. (6 mm) undersize, except round and oval dimensions which are approximately 1/8 in. (3 mm) undersize.

Multiple Section Dampers

SMD-301M Modulating Smoke Damper

Dampers larger than maximum single section size are supplied as a factory assembly of two or more sections of equal size. The following figures show damper sections and assemblies that have been qualified for operation with a single actuator. Larger size can be accommodated using multiples of these assemblies.
