

Application

Model SSFD-150 is a static rated fire damper approved for use in walls, floors, and partitions with fire resistance ratings less than 3 hours. This model carries an UL555 1½ hour UL fire damper label and is static rated for use in HVAC systems that are automatically shut down in the event of fire

Ratings

UL 555 Fire Resistance Rating

Fire Rating: 1½ hours

Construction

	Standard	Optional
Frame Depth	3 11/16 in. (94 mm)	-
Frame Material	304SS*	-
Blade Material	304SS*	-
Closure Spring	Stainless steel	-
Fusible Link	165°F (74°C)	212°F (100°C)
Mounting	Vertical	Horizontal

* in gauges required by UL listing R13317

See complete marking on product.

UL 555 Classification R13317

CAN/ULC S112 Classified Fire Damper

Model SSFD-150 meets the requirements for fire dampers established by:

National Fire Protection Association

(NFPA Standards 80, 90A & 101)

Underwriters Laboratories Standard 555

(Listing #R13317)

IBC International Building Codes

California State Fire Marshall

(Listing #3225-981:102)

* These dimension are furnished approximately ¼ in. (6mm) undersize.

Options

- Sealed transitions (sleeve required) and sleeves
- [One piece retaining angles \(POC\)](#)
- Transitions (B, C, CO, CR, R)
- Flanges

Factory Sleeve Option

All fire damper installations require the use of sleeves, angles and methods described in the installation instructions. Sleeves can be field fabricated or factory furnished as a completed damper/sleeve assembly.

Sleeves are galvanized steel and are available in 20 through 10 ga. (1 mm - 3.5 mm) thicknesses and lengths up to 36 in. (914 mm).

“K” dimension specifies location of damper within the sleeve. Minimum is 4 in. (102 mm), maximum is “L” less 4 in. (102 mm), which allows for retaining angle installation, and duct connection at each end of the sleeve. If “K” dimension is not specified, it will be provided as one half of “L” dimension (damper centered in sleeve).

Note: If using access doors, the door should be installed on the “K” side of the damper.

Sealed Option

When sealed option is selected, damper sleeve will be sealed to the damper frame or selected transition using UL approved sealant. For B transitions, the corners will need to be field sealed in the area where the duct to sleeve connection is made.

Type A, B, and B2

Dampers larger than maximum single section size are supplied in two or more sections of equal size. Multi-section dampers are factory assembled ready for installation. Dimensions are in inches (mm).

Size Limitations

Inches (mm)	Type A		Type B		Type B2	
	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum
Single Section Vertical	4 x 4 (102 x 102)	48 X 48 (1219 X 1219)	4 X 3 (102 X 76)	48 X 42 (1219 X 1067)	4 X 3 (102 X 76)	48 X 42 (1219 X 1067)
Multi Section Vertical**	NA	96 X 48 or 120 x 40 (2438 x 1219 or 3048 x 1016)	NA	96 x 42 or 110 x 35 (2438 x 1067 or 2794 x 889)	NA	96 x 42 or 120 x 35 (2438 x 1067 or 3048 x 889)
Single Section Horizontal	4 x 4 (102 x 102)	36 x 36 (914 x 914)	4 x 3 (102 x 76)	36 x 31 (914 x 787)	4 x 3 (102 x 76)	36 x 31 (914 x 787)
Multi Section Horizontal**	NA					

Maximum Single Section Dimensions

Maximum Multi-Section Dimensions

Note: All multi-section dampers with transitions will include a factory sleeve. When transition type is B or B2 on multi-section high dampers, the top section(s) are Type B or B2 and the bottom section(s) are Type A.

21 (533)	26 (660)	41 (1041)	48 (1219)
22 (559)	27 (686)	-	

* Dimensions are in inches (mm). These dimensions are furnished approximately ¼ in. (6mm) undersize, except round and oval dimensions (D, H, W) are approximately ⅛ in. (3 mm) undersize. All 'H' dimensions larger than single section height are two sections high. Refer to chart.)

Type R

Inches (mm)	Type R		
	Minimum	Maximum with 1 in. offset	Maximum with 2 in. offset
Single Section Vertical	3 (76)	31 (787)	30 (762)
Multi Section Vertical**	NA	47 (1194)	46 (1168)
Single Section Horizontal	3 (76)	35 (889)	34 (864)

Overall Damper Dimensions

Type R transition is centered in damper sleeve.

To calculate O Dimension:

Diameter + offset (1 or 2 in.) = O Dimension
